

# Leopold Education Project

## Educator Workshop at Indiana Dunes State Park

Join the staff Indiana Dunes State Park for a one day workshop on the Leopold Education Project curriculum. The wooded dunes make it a great setting for this conservation-based, interdisciplinary program.

## What is the Leopold Education Project (LEP)?

LEP is an innovative, conservation-based curriculum for grades 6-12, adaptable to grades 4 and 5. This curriculum is based on the essays found in Aldo Leopold's classic, *A Sand County Almanac*, which contains month-by-month descriptions of Leopold's relationship with the natural world. By learning about this great conservationist and his writings, educators will find a variety of practical hands-on/minds-on ways to use the natural world to teach science, math, social studies and history. This curriculum is a great tool for teachers, nature center staff, scout leaders, and other educators. We'll use the nature center auditorium and the surrounding habitat to demonstrate the lessons found in the curriculum.
